MATERIALS

PRIMALOFT® SILVER ECO INSULATION

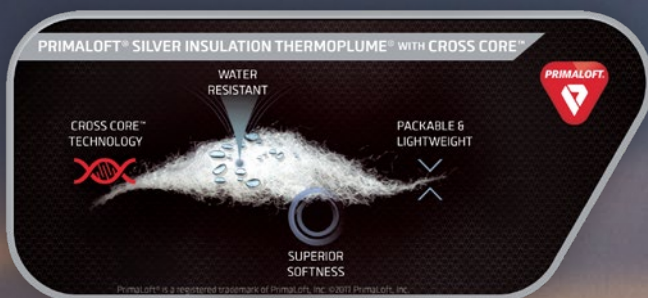

Uses post-consumer recycled materials to create the highest-performing eco-friendly insulation available.

- *Warmth without bulk:* A high warmth-to-weight ratio means you don't need bulk to stay warm.
- *Water resistant:* Absorbs less moisture from the start so you stay drier and warmer.
- *Breathable:* Encourages the passage of moisture vapor to keep you from being cold or clammy.
- *Packable and lightweight:* Warmth without weight that packs down easily for stashing in small places.
- *Superior softness:* Enjoy unsurpassed softness that feels great on your body and contributes to a flattering fit.
- *Recycled content:* Made from 70% post-consumer recycled content.

NEW

PRIMALOFT® SILVER THERMOPLUME® WITH CROSS CORE™ TECHNOLOGY

The future of cold weather gear has arrived with PrimaLoft® Silver Insulation ThermoPlume® with Cross Core™ Technology. Small, silky plumes of synthetic fiber work in symphony to mimic the lightweight warmth, softness and compressibility of natural goose down. The material scientists at PrimaLoft have raised the standard even further by fusing each individual fiber with aerogel technology to deliver the highest level of comfort and performance in an all-synthetic package. This special blend of fibers delivers the performance features you need – insulating loft, wet weather protection and compressibility. For your next backcountry adventure, cross country trip or coffee run, make PrimaLoft® Silver Insulation ThermoPlume® with Cross Core™ Technology your versatile companion.

Benefits:

- *CrossCore™ Technology = The ThermoPlume® fibers are treated with aerogel which makes it warmer than regular polyester insulation.*
- *Equivalent to 650 fillpower.*
- *Super lightweight and packable, feels like down.*
- *Water resistant and rapid drying, ensures warmth even in wet conditions.*

S. CAFÉ

The special S. Café material consists partially of recycled coffee ground which is used in the yarn production in a patented process. The material has excellent breathability, is quick drying, protects towards UV-rays and defeats odour in a natural way.

PREMIUM DOWN

8848 Altitude only use down from duck – not goose down. Our duck down is a natural left-over product from supervised farms in the food industry and is never picked from living animals.

ORGANIC COTTON

Organic cotton is grown without any chemical pesticides or fertilisers and doesn't contain any genetically modified fibres. Good for the farmers, the environment and the user of the product.

TECH SWEAT AND TECH TEE

Tech Sweat and Tech tee is a collection of fabrics providing excellent performance for technical garments.

Benefits:

- *Moisture-transporting*
- *Fast drying*
- *Lightweight*
- *Soft comfort*
- *Sun protection*
- *Stretch*

CORPORATE SOCIAL RESPONSIBILITY AND ENVIRONMENTAL WORK

8848 Altitude has worked intensively with CSR and environmental issues since many years. It is an important part of our work to make sure that the whole chain from idea to ready product is in accordance to international laws and regulations and that we continuously improve our processes, choose materials with care and aim to reduce the consumption of water, energy and chemicals. We have a long term and close relationship with our suppliers in order to live up to our goals. All 8848 Altitude products are developed and designed in Sweden and manufactured by reliable and quality aware suppliers in China, Vietnam, India, Italy, the Baltics and Sweden.

All below points are included in our agreement and signed by 8848 Altitude suppliers.

CODE OF CONDUCT

- 8848 Altitude want to make sure that all of our products will be made with right conditions, concerning human rights and environment.
- 8848 Altitude want to take responsibility to affect a better environment and working conditions in the future.
- We mainly focus on the BSCI audit. 8848 Altitude also accepts the following systems: BSCI, SEDEX, SA8000, ETI, FWF and WRAP. All factories must send the social audit report to 8848 Altitude, or contact our CSR responsible person for further guidance and application for social audit for all factories producing items for 8848 Altitude.

FLUOROCARBONS

- 8848 Altitude garments are 100% fluorocarbon free.

ANIMAL WELFARE

- All suppliers must follow national and international legislation on animal welfare. Breeders and all parties handling the animals should adhere to the the Five Freedoms defined by EU Farm Animal Welfare Council/ World Organisation for Animal Health (OIE).

WOOL

- The origin of wool must not be sheep that have been subject to mulesing, or come from farms that practice mulesing. As far as possible the wool must not originate from sheep that has been handled or sheared in any way that has caused the animals to suffer or getting harmed.

FUR

- 8848 Altitude use only synthetic fur.

DOWN AND FEATHERS

- 8848 Altitude use only duck down. Down and feathers may only originate from slaughtered birds bread for meat production. Down and feather must not originate from farms practicing live-plucking or forced feeding (foie gras). 8848 Altitude accept both IDFL and RDS.

ENVIRONMENTAL CONCERN AND CHEMICAL POLICY

- 8848 Altitude environmental concern is in accordance with current national legislation, EU legislation, which includes the REACH legislation and also voluntary schemes. Our requirements reflect an awareness of how chemicals affect human health and the environment and constantly increasing quality demands of consumers.

- 8848 Altitude continuously work to improve routines, to ensure product quality, security and thereby reduce the environmental impact of the products. All our suppliers, (producers, fabrics- and accessory supplier) receive a tool which contains the risk chemicals for each component produced. This tool helps them to focus on the relevant chemicals in the component that they produce for our products.

LABELS

- Many fabrics, accessories and details in 8848 Altitude products are certified with Bluesign standard or Oeko-tex 100.

DESIGN

- An important part of our design work is to develop quality products that are durable, has a long life and are as recyclable as possible.

BLUESIGN® APPROVED FABRICS

We use several Bluesign approved fabrics. The Bluesign standard is an independent industry standard which covers the whole textile production chain. In addition to consumer and industrial safety, it also covers the aspects of emissions and resource-protecting production. The Bluesign standard was created in 2000 by Swiss company Bluesign Technologies AG, and is a global quality seal for sustainable products and production processes.
